MEET:CHILD'S NAME

Short description of them – eg: Loves to learn, naturally curious, asks lots of questions. Visual & tactile learner. Adventurous, nurturing & caring. Happy, sweet, radiates joy! Sense of humor. Sensory Seeker

Communication

Visual and tactile learner

I use delayed echolalia/scripting to meaningfully communicate

Very talkative

Loves to ask questions

Finds it hard to put hand up or wait for turn if they want to say something

Contact Info

Here are all the ways you can contact me. I truly want to collaborate with all of you so do not hesitate to email, text or call!

Supports and Strategies

I need support staying on task – please gently remind me what I am meant to be doing

i need support with listening comprehension and following directions – if I don't understand please demonstrate or use visual clues so I can follow along

I enjoy fun and humor so please feel free to joke around with me. This helps me to feel more comfortable!

My fidget tools also provide a good break for me between activities, so if I can have a 5 min fidget break before moving onto a different activity, I am usually more engaged afterwards

Self Care

I need time to explore outside and move my body when I have been sat down for a long time

I like to read by myself

I like to play with others and make them laugh

If I am overwhelmed, I like to use my fidget tools for regulation and comfort.
